Art Unit: 2141

٠,

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 4 recites "to thereby a first one" and is unclear.

Claim Rejections - 35 USC 102

- 3. The following is a quotation of the appropriate paragraphs of 35 U. S.C. 102(e) that form the basis for the rejections under this section made in this Office action:
 - (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 4. Claims 1- 6, 8, 12-16, 20-24, 28-32, 34, are rejected under 35 U.S.C. 102(e) as being anticipated by Nishio et al. with Patent Number 6,381,651.
- 5. Regarding claim(s) 1, 12, 20, 28, Nishio teaches providing plural categories of human interest as "fields (genres)", col. 3, lines 57-58 and categories have respective scopes as "hobbies", etc., col. 5, lines 1-4. Nishio teaches activating a client on the local device, col. 3, lines 15-17 and a web browser requesting a first page, col. 4, lines 47-49. Nishio teaches after the web browser requests a web page, the client automatically obtaining one of the plural of

Application/Control Number: 09/718,604

Art Unit: 2141

categories in which the web page belongs as page "summary information", col. 5, lines 17-21. Nishio teaches after the category is obtained automatically obtaining a recommended web page which is in one of the categories, col. 10, lines 8-14. Nishio teaches the client outputting a message to the output device which informs the user of a recommendation, col. 10, lines 48-52. Nishio teaches the user providing input to the client indicative of the user's desire to activate the recommendation and in response causing the browser to request the second or recommended page, col. 11, lines 15-21. Nishio teaches the browser requesting the second page and outputting the second page to the output device, col. 12, lines 12-15.

- 6. Regarding claim(s) 2, 13, 21, 29, Nishio teaches the step of the client obtaining the recommendation after the user provides input as "provided to a user" which is in the past tense, col. 4, line 4 and then new pages are recommended.
- 7. Regarding claim(s) 3, 31, Nishio teaches the client is an independent program as the "ID server judges whether the new home page suits the favorites of the user" which is independent of user/client, col. 3, lines 26-28.
- 8. Regarding claim(s) 4, 14-15, 22-23, 30, 32, Nishio teaches providing a page categorization database correlated to categories of human interest, col. 8, lines 48-54 and col. 14. lines 21-28. Nishio teaches looking up the first page in the database to correspond the page with one of categories of interest, i.e. "music", col. 14, line 9-14.
- 9. Regarding claim(s) 5, 16, 24, Nishio teaches the web browser storing a resource locator (URL) corresponding to the first page as "information identifiers" (ID), col. 14, lines 50-54 and specifically a URL, col. 17, lines 22-23, 34-37. Nishio teaches the client copying or using the

Application/Control Number: 09/718,604

Art Unit: 2141

URL or ID for looking up the first page in a correlation table based on content as "subject ID" col. 14, lines 55-60.

- 10. Regarding claim(s) 6, Nishio teaches the first page locator is an URL, col. 5, lines 21-25.
- 11. Regarding claim(s) 8, 34, Nishio teaches the output device is a display for pages, col. 11, lines 25-29.

Claim Rejections - 35 USC § 103

- 12. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 13. Claims 7, 9-11, 17-19, 25-27, 33, 35-37 are rejected under 35 U.S.C. 103(a) as being unpatentable Nishio et al. with Patent Number 6,381,651 in view of Schmid et al. with Patent Number 6,438,578.
- 14. Regarding claim(s) 7, 17, 25, 33, Nishio teaches providing plural categories of human interest as "fields (genres)", col. 3, lines 57-58 and categories have respective scopes as "hobbies", etc., col. 5, lines 1-4. Nishio teaches activating a client on the local device, col. 3, lines 15-17 and a web browser requesting a first page, col. 4, lines 47-49. Nishio teaches after the web browser requests a web page, the client automatically obtaining one of the plural of categories in which the web page belongs as page "summary information", col. 5, lines 17-21. Nishio teaches after the category is obtained automatically obtaining a recommended web page

Page 5

Application/Control Number: 09/718,604

Art Unit: 2141

which is in one of the categories, col. 10, lines 8-14. Nishio teaches the client outputting a message to the output device which informs the user of a recommendation, col. 10, lines 48-52. Nishio teaches the user providing input to the client indicative of the user's desire to activate the recommendation and in response causing the browser to request the second or recommended page, col. 11, lines 15-21. Nishio teaches the browser requesting the second page and outputting the second page to the output device, col. 12, lines 12-15. Nishio teaches the invention in the above claim(s) except for explicitly teaching providing the user with the option to access a next recommended page. In that Nishio operates to categorize data in a computer network, the artisan would have looked to the network data referral management arts for details of implementing other options. In that art, Schmid, a related network data referral communication system, teaches "network server determines whether a request is a second request", col. 6, lines 19-20 in order to provide relevant data. Schmid specifically teaches "the network client to request supplemental information", col. 6, lines 42-43. Further, Schmid suggests identifying "the supplemental information to the network client as having originated with the requested information source", col. 7, lines 14-16 which will result from implementing the referral and there are no limits on the number of supplemental requests possible. The motivation to incorporate multiple recommendations insures user demand is met. Thus, it would have been obvious to one of ordinary skill in the art to incorporate multiple recommendations as taught in Schmid into the communication system described in Nishio because Nishio operates with multiple referrals and Schmid suggests that optimization can be obtained by providing multiple or supplemental referrals. Therefore, by the above rational, the above claims are rejected.

Application/Control Number: 09/718,604 Page 6

Art Unit: 2141

15. Regarding claim(s) 9, 18, 26, 35, Schmid teaches automatically recommending a third page as a "supplemental page" based on categories, col. 6, lines 48-56 and after the "first request" is a second request" or recommendation, col. 5, lines 9-11 and in response the client causing a third page to be outputted, col. 7, lines 12-13.

16. Regarding claims 10-11, 19, 27, 36-37, the Nishio patent discloses the method of the preceding claims. The Nishio patent does not explicitly disclose providing recommendations for free or charging an account. However, Official Notice is taken MPEP 2144.03 (a)) that providing recommendations for free or charging an account is well known in the art to insure adequate rewards for development are satisfied or marketing is enhanced. It would have been obvious to one of ordinary skill in the art at the time of the application's invention to provide recommendations for free or charging a an account to obtain the advantages of profit or marketing. By the above rational, the claims are rejected.

Conclusion

- 17. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is disclosed in the Notice of References Cited. A close review of the references is suggested. The other references cited teach numerous other ways to perform network web page referrals, thus a close review of them is suggested.
- 18. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephan Willett whose telephone number is (703) 308-5230. The examiner can normally be reached Monday through Friday from 8:00 AM to 6:00 PM.
- 19. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Rupal Dharia, can be reached on (703) 305-4003. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

20. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-9605.
